

DuPont AdvionTM Advion[®]

COCKROACH GEL BAIT

DuPontTM Advion[®] Cockroach Gel bait is an insecticide, that contains 0.6% indoxacarb, in the form of a ready to use bait for the control of cockroaches.

DuPontTM Advion[®] Cockroach Gel controls Cockroaches, including :
Oriental cockroach (*Blattella orientalis*)
German cockroach (*Blattella germanica*)
American cockroaches (*Periplaneta americana*)

DIRECTIONS FOR USE:

- For use by professional operators only.
- For use in single & multi-family residential buildings, commercial and industrial facilities, public & institutional buildings and transportation equipment.

General information

Advion[®] Cockroach Gel bait is designed to control pest species of cockroaches and is effective against both adult and nymph stages. The slight delay in mortality caused by the active ingredient, indoxacarb, allows cockroaches to consume the bait and return to the harbourage site to contaminate other cockroaches, resulting in significant reduction in infestation levels.

1. Indoor use

- Advion[®] Cockroach Gel bait should be applied in areas inaccessible to children or pets
- infested areas should be carefully inspected to determine overall infestation levels, locations of harbourage sites and most appropriate application points
- Advion[®] Cockroach Gel Bait can be used indoors in both food/feed storage areas & non-food/non-feed areas, applied as a crack & crevice treatment in and around residential homes, industrial facilities, offices, warehouses, commercial kitchens, hospitals, schools, nursing homes, hotels, buses, trains, aircraft, retail and commercial establishments, or at suitable placement sites that act as cockroach harbourages.
- Advion[®] Cockroach Gel Bait can also be placed inside approved bait stations, or similar devices, to ensure product is inaccessible to children or pets, and said devices should be placed in areas where cockroaches are active.

2 Outdoor use

- Advion[®] Cockroach Gel bait should be applied in areas inaccessible to children, pets & non-target organisms
- a thorough inspection around a structure may reveal areas where cockroaches are gaining access; attempts should be made to block the access
- Advion[®] Cockroach Gel bait should be applied to pest entry sites such as around windows & doors, between construction elements, or at suitable placement sites that act as cockroach harbourages.
- Advion[®] Cockroach Gel Bait can also be placed inside approved bait stations, or similar devices, to ensure product is inaccessible to children or pets, and said devices should be in areas where cockroaches are active.

3. Advion[®] Cockroach Gel bait should be applied as small spots of material, or alternatively, thin beads of gel

4. Several small applications distributed within an area are more effective than 1 or 2 applications of large quantities.

5. Advion[®] Cockroach Gel bait should be applied to areas frequented by cockroaches such as between different elements of construction, between equipment and floors, openings leading into voids and hollow spaces in floors, walls, ceilings, equipment legs & bases, around plumbing pipes, doors and windows, and behind and under appliances, cabinets, sinks, closets and any other equipment that cockroaches are known to hide in or behind.

6. Avoid applying Advion[®] Cockroach Gel bait to surfaces recently treated with repellent residual insecticide sprays

7. Areas where Advion[®] Cockroach Gel bait has been applied should not be sprayed with repellent residual insecticides

8. Bait placements should be inspected periodically for consumption and reapplied as necessary

STATUTORY CONDITIONS RELATING TO USE

- FOR USE ONLY AS AN INSECTICIDE
- FOR USE ONLY BY PROFESSIONAL OPERATORS
- USE APPROPRIATE PROTECTIVE CLOTHING
- FOR USE ONLY IN AREAS THAT ARE **INACCESSIBLE** to infants, children, companion animals and non-target animals
- DO NOT APPLY IN OR AROUND DRAINS
- DO NOT apply to areas where food/feed, food utensils or food processing surfaces may come into contact with, or be contaminated by the product
- DO NOT APPLY to areas that are frequently cleaned as this will remove the gel bait
- Application rate : from 0.2 g/m² up to 0.5 g/m²

Application rate:

- apply a minimum of 2 spots of gel per m²
- an increased number of spots of gel (up to 5 per m²) may be required under conditions of heavy cockroach infestation, extremely dirty conditions, or where Oriental cockroaches and American cockroaches predominate

Note :

- spot size of 5 mm diameter weighs approximately **0.1 g**
- spot size of 10 mm diameter weighs approximately **0.5 g**
- thin bead 5 cm long & 0.3 mm wide weighs approximately **0.35 g**

To apply the gel, remove the cap on the nozzle and whilst touching the tip of the nozzle to the surface to be treated, slowly depress the plunger until sufficient gel is dispensed. Recap the dispenser once treatment is complete.

PRECAUTIONS

- when used outdoors, ensure the product is applied to areas that are inaccessible to wet washing or wash-out by rain
- do not apply to surfaces where temperature can exceed 50°C as this could cause the gel to liquefy and lose effectiveness. (examples include, but are not limited to, parts of stoves, ovens, grills, fume hoods, saunas, heat lamps, fryers, dishwashers and hot water pipes)
- avoid contact with skin, eyes or clothing
- wash thoroughly with soap and water after handling the product
- wipe up product spills or excess product at the end of treatments with paper towel and dispose of used paper towel to landfill
- do not refill or re-use the gel bait dispenser; empty dispensers must be disposed in a safe manner
- store in original packaging in a locked, dry place, avoiding extremes in temperature, that is **inaccessible** to children and non-professional people
- contact the National Poison Information Service in case of emergency

READ ATTACHED INSTRUCTIONS BEFORE USE
(BPR : UK-2010-0001)

Insect resistance management

- in order to minimise the risk of insect resistance (either physiological or behavioural) it is recommended that Advion[®] Cockroach Gel bait is not used exclusively in a cockroach elimination programme
- this product should rather be used as part of an eradication programme that utilises products containing an active ingredient with a mode of action different to that of indoxacarb, the active ingredient in Advion[®] Cockroach Gel bait
- since the occurrence of resistant individuals is difficult to detect prior to use, DuPont accepts no liability for any losses that may result from the failure of Advion[®] Cockroach Gel Bait to control certain resistant insects.

Contains Indoxacarb. May produce an allergic reaction

R52/53 - Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

S35 - This material and its container must be disposed of in a safe way.
S61 - Avoid release to the environment. Refer to special instructions/ Safety data sheets.

This product is approved under the Biocidal Products Regulations (as amended) 2001. For use only as directed.
