DO NOT PLACE BAIT where food, feed or water could become contaminated (except when used in sewers).

AVOID ALL CONTACT BY MOUTH.

THIS MATERIAL AND ITS CONTAINER MUST BE DISPOSED OF AS HAZARDOUS WASTE.

HSE 7181

READ ALL PRECAUTIONS BEFORE USE.

DIRECTIONS FOR USE

Deadline Rat Blocks are ready-to use bait blocks for use in the control of rats indoors and outdoors. Place 1-2 blocks (120-240g of bait) per bait box or in well protected situations, in runs or near harbourages to offer maximum opportunity for feeding. Where appropriate, secure the bait block at its placement site to reduce the likelihood of its removal by rodents, or by surges of water if intended for use in sewers. To increase the likelihood of bait takes, it is particularly important to ensure that the availability of alternative food sources is minimised at the onset of treatment.

Always position baits well so as to protect from the prevailing weather and to prevent access by humans, domestic animals and wildlife. Inspect the baits at appropriate intervals and replace blocks until no more bait is taken.

PRECAUTIONS

To avoid risks to man and the environment comply with the instructions for use.

WASH HANDS AND EXPOSED SKIN before meals and after use.

Keep only in the original container. Keep container tightly closed. KEEP IN A SAFE PLACE.

In case of accident or if you feel unwell seek medical advice immediately (show the label where possible). Safety data sheet available for professional user on request.

ADVICE TO DOCTOR

Bromadiolone is an indirect anticoagulant. Phytomenadione (Vitamin K1) is antidotal. Determine prothrombin times not less than eighteen hours after consumption. If elevated, administer Vitamin K1 until prothrombin time normalises. Continue determination of prothrombin time for two weeks after withdrawal of antidote and resume treatment if elevation occurs in that time.

The resistance status of the target population should be taken into account when considering the choice of rodenticide to be used.

THIS PRODUCT IS APPROVED UNDER THE UK CONTROL OF PESTICIDES REGULATIONS 1986 FOR USE AS DIRECTED.
